Chirag Gupta

8769240601 | **chirag1706gupta@gmail.com** | **linkedin.com/chiraggupta1706** | **github.com/chirag876**

Summary

Backend Engineer with 3.2 years of experience in Python, building REST APIs, microservices, and data pipelines. Immediate Joiner.

Technical Skills

Languages & Frameworks: Python, SQL, Django, FastAPI, Flask, Asyncio, Pydantic, SQLAlchemy, Pandas, NumPy
Databases & Cloud: MongoDB, MySQL, Google BigQuery, SQL Server, GCP (Cloud Functions, Pub/Sub), AWS (S3, EC2)
Architecture & Tools: RESTful APIs, RAG, Microservices, Multi-Tenant Architecture, CQRS, OAuth 2.0, Event-Driven ETL, Docker, Git, GitHub, Postman, Swagger
AI & LLM Tools: VectorDB, Sentence Transformers, LLM, LangChain, RAG Pipelines
Analytics & BI: Power BI, Qlik Sense

Experience

Backend Engineer Sept 2025 – May 2026
Edufusion Tech | FastAPI, MongoDB, AWS S3, Zoom OAuth, Docker *Jaipur, Rajasthan*

- Built a Digital Assessment Platform supporting multiple question types, configurable scoring, timed submissions, and automated result publishing.
- Developed a Live Classroom Scheduling System with Zoom OAuth integration and conflict detection across scheduled sessions.
- Designed an Exam Registration workflow with IST-based time-window validation, dynamic PDF admit card generation from configurable university templates, and third-party exam portal integration for student verification.

Associate Cloud Native SDE April 2025 – June 2025
D3V Technology Solutions | Python, GCP Cloud Functions, Pub/Sub, BigQuery, Asyncio, MySQL *Jaipur, Rajasthan*

- Architected a cloud-native, event-driven ETL pipeline using Asyncio and GCP Pub/Sub for cross-environment BigQuery migrations, dynamic schema adaptation, and concurrent data processing.
- Implemented MySQL-backed pipeline metadata tracking and execution logging with automated retry mechanisms, service account authentication, and structured error auditing.

Software Engineer Jan. 2023 – March 2025
Spectral Tech AI | Python, Django, Flask, Azure, RESTful APIs, CQRS, NLP, SQL *Jaipur, Rajasthan*

- Developed microservices for a Python (Flask)-based CRM and time-tracking system using CQRS pattern and RESTful APIs, providing real-time executive analytics on leads and resource utilization.
- Architected a full-stack Django POC (*WhiteSpace Admin*) for real-time collaborative whiteboarding, incorporating session management, non-transferable host permissions, and dynamic PDF/image export.
- Developed a time-tracking and HR reporting system for employee project association, utilization tracking, and report management across teams.

Projects

EduLens-AI | *Python, FastAPI, ChromaDB, Groq, Sentence Transformers, PyMuPDF* – GitHub

- Built a production-grade RAG pipeline supporting PDF and video ingestion with per-page citation tracking, semantic retrieval, and LLM-grounded answer generation.
- Engineered multi-source ingestion with automatic deduplication, page-level chunking, and optimized batch embedding for 400+ page documents.
- Implemented a moderation layer with relevance scoring, harmful content detection, and grade-level personalization for student-facing responses.

SmartPDF - AI Extraction Engine | *Python, FastAPI, Gemini API, Pandas, Camelot* – GitHub

- Engineered a RESTful parsing API using FastAPI to extract structured tables and metadata from complex PDFs via rule-based spatial layout parsing.
- Built a hybrid AI extraction engine integrating Gemini LLMs with deterministic fallback logic to accurately parse non-standard, multi-column invoice layouts.

Education

Poornima College of Engineering Jaipur, Rajasthan
B.Tech, Information Technology *Aug. 2019 – July 2023*
